

FOR IMMEDIATE RELEASE

VIATRONIX TO DEBUT SECTRA PACS INTEGRATION AT ECR

March 10, 2003, STONY BROOK, NY

Viatronix, Inc. a developer of 3D medical imaging software, announced today that it has completed integration of its V3D-Colon and V3D-Explorer packages with the Sectra PACS through their Clinical Solutions Network ("CSN"). The combined products are on display at ECR, the European Congress of Radiology this week in Vienna, Austria.

"Integrating our products into Sectra's CSN means that the large number of radiology departments already utilizing Sectra's PACS solutions can now also choose the proven "best of breed" 3D clinical applications right on the same workstations they already have deployed around their hospitals and imaging centers" states Dave Barnitt, CEO of Viatronix. "This allows them to add performance in 3D imaging and new clinical applications without having to add more machines"

Coinciding with colo-rectal cancer awareness month in March, this milestone results in over 350 current Sectra PACS users having access to V3D-Colon and being able to offer non-invasive colo-rectal cancer screening to a much larger audience. Viatronix V3D-Colon is the only product on the market that requires a simple preparation regimen for the patient making the colonoscopy experience more acceptable to the patient. Together with patented features such as automatic segmentation and total surface coverage, Viatronix V3D-Colon is the most efficient system on the market whether performing a "2D-first" or a "3D-flythrough" virtual colonoscopy.

V3D-Explorer is also available for Sectra workstations. V3D-Explorer is robust general-purpose diagnostic imaging software solution that has been proven to add diagnostic value to CT Angiography, MRA, neurology, vascular, skeletal, and pulmonary exams. It is designed as a multi-purpose 2D and 3D viewing and post processing workstation that accepts DICOM compliant MRI and CT images. Superior image quality and performance together with a collection of easy-to-use editing tools enhance daily workflow in busy radiology departments. V3D-Explorer enables radiologists to visualize, measure and analyze patient's studies in any 2D or 3D projection. The V3D-Explorer system is tightly integrated with Viatronix's suite of 3D imaging products for cross-functional capabilities.

"The V3D suite of products provides exceptional image quality and ease-of-use features. With the Sectra Clinical Solutions Network, we aim at maximizing the benefits that users derive from our PACS workstations by being able to offer highly specialized clinical

applications integrated to the desktop, added Jakob Algulin, manager of the Clinical Solutions Network program at Sectra Imtec AB.

About Viatronix, Inc.

Viatronix is a leading innovator and developer of diagnostic 3D imaging software, which enables physicians to interactively view patients' vital organs and anatomical structures. The Viatronix V3D-Explorer has patent protected technology, which enables 3D visualization of organs from patient data acquired by standard imaging equipment in a minimally or non-invasive methods. The V3D-Colon allows physicians to interactively view the colon reconstructed from a CT scan, providing visualization of the inner surface of the colon including polyps. The V3D-Calcium Scoring aids physicians in determining the amount of calcium plaque accumulation in the coronary arteries. Viatronix, through application of the V3D technology, is developing additional innovative products that will be useful in earlier detection of other diseases, treatment planning, and follow up evaluation. Viatronix, Inc. is located in Stony Brook, NY. For further information, call toll free 1-866-887-4636 or log on to www.viatronix.com

About Sectra Imtec AB

Sectra is one of today's major diagnostic imaging providers with more than 350 installations worldwide. Sectra's core business is to deliver top-of-the-line high-availability, robust enterprise diagnostic imaging for 24/7 operation. In Sweden and Norway, which are currently the countries with the largest penetration of diagnostic imaging systems in the world, Sectra holds a dominant market leadership with more than 50 percent of all film-free installations. The company has also a large number of installed systems in Finland and Denmark, and through partnerships, systems installed in most major countries in Europe, Far East, Canada and the US. For more information, visit www.sectra.com.
