

FOR IMMEDIATE RELEASE

VIATRONIX™ APPOINTS CHARLES A. SANDERS, MD TO ITS BOARD OF DIRECTORS

STONY BROOK, NY, JULY 20, 2001- Viatronix Inc., a developer of breakthrough computer technology in the field of 3D medical imaging, today announced that Dr. Charles A. Sanders, former chairman and CEO of Glaxo Inc., has been elected to its Board of Directors.

According to General Thomas P. Stafford, Viatronix Chairman of the Board, "Dr. Sanders brings to Viatronix an extensive background in the pharmaceutical industry, as well as an illustrious medical career. He will be extremely instrumental in furthering Viatronix's goal of presenting the latest technological advancements in 3-D imaging to the medical community for diagnosing and preventing life threatening diseases."

Before joining Glaxo Inc., Dr. Sanders spent eight years with Squibb Corporation, where he held a number of posts, including the position of vice chairman. Previously Dr. Sanders was general director of Massachusetts General Hospital and professor of medicine at Harvard Medical School. Dr. Sanders is the past chairman of the New York Academy of Sciences and he is a current member of the Institute of Medicine of the National Academy of Sciences and chairman of the Foundation for the National Institutes of Health. Currently Dr. Sanders serves on the board for Genentech Inc. and several other medical related companies. In the past Dr. Sanders has served on the boards of several multi-national corporations, including Merrill Lynch and Company, Morton International Inc., and Reynolds Metals Company.

About Viatronix, Inc.

Viatronix is a leading innovator and developer of diagnostic 3D imaging software, which enables physicians to interactively view patients' vital organs and anatomical structures. The v3D System has patent protected technology, which enables 3D visualization of organs from patient data acquired by standard imaging equipment in a minimally or non-invasive method. The company's first product, v3D-Colon, allows physicians to interactively view the colon reconstructed from a CT scan, providing visualization of the inner surface of the colon including polyps. Viatronix, through application of the v3D technology is developing additional innovative products that will be useful in earlier detection of other diseases, treatment planning, and follow up evaluation.
