**National Imaging Resources and Viatronix, Inc. Sign a National Sales & Distribution Agreement for Selling the Viatronix V3D - Work Station.**

**August 4, 2003, Stony Brook, NY**

*National Imaging Resources (NIR) of Willoughby, OH and Viatronix Inc.* announced today that they have signed a one-year, renewable national sales and distribution agreement that will enable all NIR members to sell the 2D/3D Viatronix work station into the radiology market.

"This agreement is a major milestone in our current strategy of reaching a wider radiology customer base through established distributors nationwide," said David Barnitt, CEO of Viatronix, Inc. "NIR constituents are proven sales organizations that have created niche markets for themselves in different corners of the country," he added. Viatronix expects to announce other such agreements in the near future.

"The Viatronix V3D Work Station represents a strategic addition to our product portfolio and fits well into our 'high-end' digital equipment offering," said Randy Lester, President of NIR.

#### **About NIR**

National Imaging Resources (NIR), was formed in 1995 to utilize the strength of independent capital equipment dealers across the country. The principles of each company are equal shareholders and therefore committed to the success of the entire organization. NIR is one of the largest medical equipment sales and service organizations in North America. With over 150 sales representatives and 400 service engineers covering the 50 United States, Puerto Rico and Caribbean Basin, it is uniquely poised to respond to the ever changing medical imaging needs of its customers. NIR continues to forge strategic alliances with key manufacturers and maintain its position as a world-class capital equipment supplier. #### **About Viatronix, Inc.**

Viatronix is a leading innovator and developer of diagnostic 3D imaging software, which enables physicians to interactively view patients' vital organs and anatomical structures. The Viatronix V3D-Explorer has patent protected technology, which enables 3D visualization of organs from patient data acquired by standard imaging equipment in a minimally or non-invasive methods. The V3D-Colon allows physicians to interactively view the colon reconstructed from a CT scan, providing visualization of the inner surface of the colon including polyps. The V3D-Calcium Scoring aids physicians in determining the amount of calcium plaque accumulation in the coronary arteries. Viatronix, through application of the V3D technology, is developing additional innovative products that will be useful in earlier detection of other diseases, treatment planning, and follow up evaluation. Viatronix, Inc. is located in Stony Brook, NY. For further information, call toll free 1-866-887-4636 or log on to [www.viatronix.com](http://www.viatronix.com).
